Seal Repair Program

All Makes & Models

*Repair or Replace?
You be the judge.*

Cleaning & Evaluation

Cardon Sales Company's repair facility is state-of-the-art. We have made a commitment to repair all mechanical seal styles regardless of condition. If the seal is not repairable we will quote a new replacement seal. Each seal component is cleaned and evaluated in detail: faces, elastomer, and glands, etc.

Packaged securely for shipping and handling. Boxes are sized for minimum space conditions.

Testing & Assembly

Analysis

Information is gathered and noted as a detailed analysis is compiled. This information is then used to analyze the overall performance of the seal and to assure we repair or replace the seal with the best and most realizable sealing option.

Repairing

Seal faces are lapped to within one or two light bands. We offer a state-of-the-art facility with specialists dedicated to seal repairs. Every seal must pass a 40 psi pressure test before leaving our facility.
